

WEEK ONE

Grades 3, 4, & 5

April 27th – May 1st

	Monday	Tuesday	Wednesday	Thursday	Friday
Reading	Talk about the cover of the book. Guess what the book is about. Who are the characters? What the title? Who is the author and illustrator?	When reading today change your voice to go with the characters and action. Make sure you don't read too quickly or slowly.	After reading today talk to an adult about what happened in the story and make a prediction of what will happen next. If you finished a book, what do you think could happen next?	Try to make a personal connection to something in the story. For example: How are you like the character? Have you done something similar?	If the weather is nice go outside snap a picture of you reading and send to your teacher.
Oral Language	Find a bag and hide an item inside. Can you use enough descriptive words to have someone correctly guess what's inside?	What's your favorite breakfast meal? Make it with someone in your house and use your 5 senses to describe it as you eat!	Sit in a circle with your family. Have one person be the sentence starter (ex: The dog ran.) Go around the circle repeating the sentence with a new word added each time.	Would you rather be 10 feet tall or have 10 feet? What would be the pros and cons of each option? Talk it out with a buddy!	Pick a number from 1 - 1000. Have someone guess by asking questions like is it higher than 500? Does it have a 2 in the ones place?
Writing	If you could build a dream house, what rooms would it have?	Write a story about going on an adventure with your best friend.	Who has the best job in the whole world?	Where do you get your best ideas?	Have you ever volunteered to help someone? What did you do?
Math	<u>Adding Day</u> Check out our website to find resources to help practice adding 😊	<u>Subtracting Day</u> Check out our website to find resources to help practice subtracting 😊	<u>Multiplication Day</u> Check out our website to find resources to help practice multiplication up to 5 x 5 😊	<u>Division Day</u> Check out our website to find resources to help practice division related to multiplication. No higher than $25 \div 5 = 5$ 😊	<u>Free Choice</u> It's Free Choice Friday. Finish/practice whatever you like and play a math game 😊

Science :

STEAM Challenge of the week:

Marshmallow Catapult
A catapult is a machine used to throw objects to cause damage to a structure. Some were set on hills to shoot objects farther. Design and create your own catapult using objects that you have at home (popsicle sticks, elastics, cardboard, dixie cups, etc.) Draw a blueprint before you create your catapult. When you are done use marshmallows or cotton balls to test your catapult. Good Luck!

Colour Wars:

Here is your Colour War challenge of the week:

Your challenge this week is to help prepare a meal. Take a picture of you helping to make a meal or dessert and send it to your teacher so we can put it on our website. (Who knew Math could be so fun and delicious) 😊
